

[Winners of the Andean Statistical Competition visit Eurostat](#)

The winners of the Andean Statistical Competition launched by the General Secretariat of the Andean Community (CAN) visited Eurostat on Monday and Tuesday. The winners were awarded prizes for essays on statistical themes within the framework of Andestad, the four year EU-CAN statistical co-operation project launched in 2005.

The visit included presentations about the work of Eurostat and the functioning of the European Statistical System, as well as meetings with colleagues from Migration and Demography, National Accounts, Social statistics, International trade statistics, Communication and Dissemination Units.

On our picture: Ernesto Azorin Minguez from Unit E5, with Doris Mireya Olmos Pacheco, an Ecuadorian journalist specialising in social themes (left), and Cristina Jazmin Tello Trillo, a Peruvian Researcher, who has actively contributed to a Latin American economic and social integration project for the UN's Economic Commission for Latin America and Caribbean (ECLAC).

Missing from the picture: Nancy Milena Hoyos Gomez teaches Econometrics at the Central University of Colombia.
